

Discs2Go

Thank you for your using Discs2Go.

1. Introduction

Discs2Go is a software application that specializes in Mac disc images. Though it's a light-weight application, there are many things you can do with Discs2Go. You can easily convert folders into Read/Write disc images. Using Discs2Go, you can also attach software license agreement to disc images with ease. One amazing feature is (Disc) **Mimic**. Mimic allows the user to copy the exact style of a source disc volume and simulate it on another.

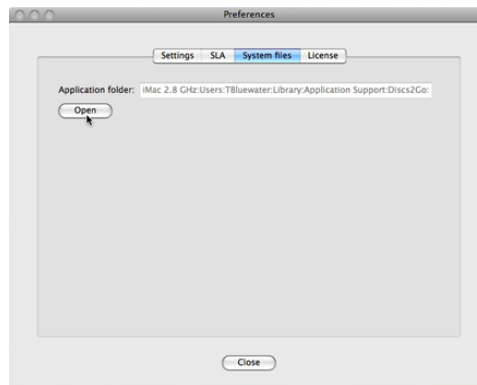

2. Installing Discs2Go

You can give it its own folder if you like, or just drag and drop a copy of Discs2Go anywhere even inside a USB drive. If you have installed and used a beta/demo/trial version of Discs2Go, it is not necessary that you delete the application though we recommend that you trash it with its application data folder.

3. Uninstalling Discs2Go

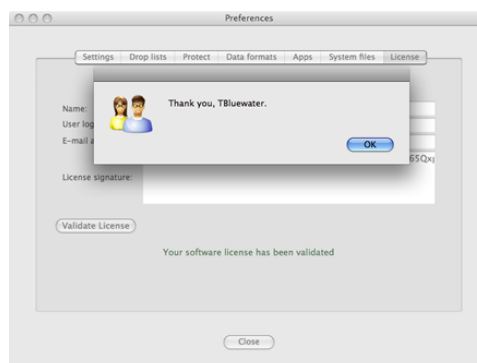

When launched for the first time, Discs2Go will create a folder containing several files inside the **Application Support** folder, which you need to trash on top of the application file itself. You can easily locate this folder by opening **Preferences** and switching tabs to **System files**.

4. Validating Discs2Go (not applicable to Mac App Store product)

In order to access all features that are available with Discs2Go, you need to validate your license at first. Please note that you cannot use the trial version to validate your license.

First of all, please run the licensed version of Discs2Go so that a file will be created inside the Discs2Go folder of the Application folder. Then click on the Preferences button on the top **Toolbar** menu and navigate to the tab labeled **License**. You must have received an e-mail message titled **Discs2Go License** from us by this time. In reference to **Validating a license**, please enter all input fields **except User login**. This field is not editable simply because it comes from your Mac. It must be the name of the current user that you reported earlier. The name of the current user is a username, not a system password, which should be kept confidential to yourself. We have generated a license signature based on your submission. If you submitted and therefore see a wrong user name, then you will not be able to validate your license. In such case, please contact us by opening a support ticket at MacHouse Support (<http://support.mhvt.net/>).

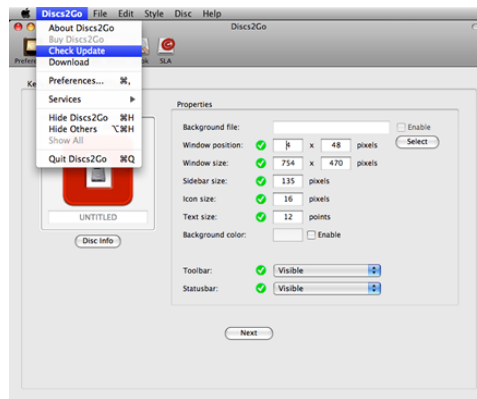

(Screenshot comes from the license window of a different application)

If all input fields are filled, then click on **Validate License** once and for all. If validation is successful, then a message should pop up, thanking you for your using Discs2Go.

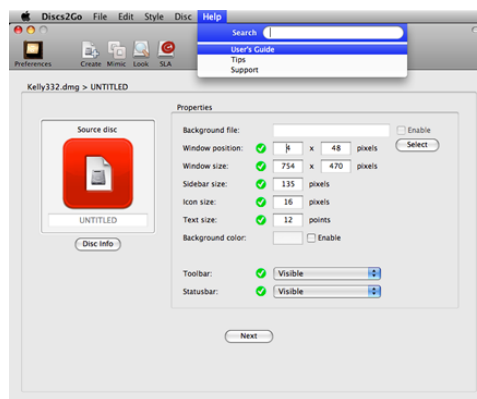

5. Updating Discs2Go (not applicable to Mac App Store product)

None of our software products supports an automatic update feature for the security reason. Discs2Go is not an exception. In the meantime, find **Check Update** under the Discs2Go menu to see if there are newer versions available. If a message says there are, then choose **Download** to go to our website to download the latest version. You need to log in at first. Please refer to the e-mail message titled **Discs2Go License** for login information. After downloading the latest update, just replace an existing application file with a new one.

6. Using Discs2Go

User's Guide is available online at <http://www.mhvt.net/quicktime/eng/discs2go/usersguide.php> so that we can update you whenever necessary.

7. Support

If you have any trouble with Discs2Go or have questions or suggestions, please go to MacHouse Blog (<http://machouse.mhvt.net/?p=1537>). You can also contact us by opening a support ticket at MacHouse Support (<http://support.mhvt.net/>) only if privacy needs to be protected.

Discs2Go is a product of MacHouse.
